

100 Neoprene Roof Cement

An all-purpose, all-weather patching and flashing cement for asphalt, modified bitumen, metal, EPDM, Hypalon and TPO roofs. Lucas Neoprene Cement is a premium synthetic rubber based sealant and caulk. Ideal for caulking termination bars, metal flashings and fasteners. It contains no asphalt or other bituminous material. Contains anti-oxidants and light stabilizers for extended life and reinforcing fibers that add strength and durability. Available in black.

776 Elite™ Flashing Cement

All-weather rubberized flashing cement with strong, flexible polyolefin micro-fiber reinforcement. Highest quality and performance available. Designed as a super-premium, high-performance flashing cement intended for use on modified bitumen and asphalt roofs. It is also an excellent cold process inter-ply adhesive for SBS modified bitumen and is recommended as a high-performance shingle tab cement.

779 All-Weather Flashing Cement — Premium

An asphalt based roof cement designed for repairing roofs and roof flashings that are wet or under water. This permits repairs immediately and can prevent more extensive water damage. Manufactured from Type I Roofing Asphalt, reinforcing fibers, petroleum solvents and a special additive which displaces moisture and allows application to wet surfaces. Lucas 779 is also recommended as a shingle tab cement.

9600 STS Joint & Termination Sealant

A 100% solids moisture cure sealant primarily intended for sealing large joints and termination bars. Lucas 9600 contains no solvents or other volatile ingredients and will not shrink. Outstanding adhesion to metal, concrete, masonry, wood, EPDM, PVC, vinyl surfaces, silicone surfaces, and most other common building materials. This sealant has minimal odor, contains no solvents and contains less than 10 grams per liter VOC.

8600 Edge Seal

A self-leveling single-ply lap edge sealant and water cut-off mastic. Polymer based Lucas 8600 Edge Seal is a low modulus, butyl rubber based, self-leveling sealant. It is intended for use as a lap edge sealant and water cut off mastic on single-ply roofs including EPDM and TPO. This is also useful anywhere a low modulus sealant is desired such as in OEM trailer and RV applications. Based on butyl rubber in a fast drying, HAP free solvent system.

6600 Universal™ Sealant

A high-performance, multipurpose thermoplastic elastomer based sealant. Excellent adhesion to most surfaces including: metal, Kynar®, asphalt, shingles, modified bitumen, EPDM, TPO, Elvaloy/PVC, Hypalon, vinyl, fiber cement, wood, concrete, tile, masonry, and glass. Available in clear, black, white and various colors. Available in three grades: Standard Grade, Self-Leveling Grade and Winter Grade. Ideal for residential roofing applications where appearance is important.

5600 Gutter Seal

A multipurpose, nitrile rubber based self-leveling sealant. Specifically designed as a narrow seam sealant for gutter lap joints. Low modulus and high elongation accommodate severe movement. Excellent adhesion to metal gutters including copper and Kynar®. For a non-sag or colored roof sealant please refer to Lucas 6600 Universal™ Terpolymer Sealant. Standard color is Aluminum.

✓

4500 Pitch Pocket Sealant

A one-component, non-shrink, advanced technology polyurethane sealant designed for sealing pitch pockets and pans, metal roof seams & fasteners, inlaid gutters and polyurethane foam roofs. It is ideal for repairing hail damaged polyurethane foam roofs as it is 100% solids and will not shrink like water-based sealants. It is semi self-leveling so that it can be used to fill pitch pockets and pans, seal gutters and metal roof seams & fasteners with minimal tooling.

extended life and reinforcing fibers that add strength and durability. Available in three grades with different viscosities and leveling characteristics.

7500 Paver Adhesive

A fast setting, elastomer-based adhesive for concrete and natural stone pavers and roof walkway pads. Excellent adhesion even to slightly damp surfaces. Use to secure step stones and risers, pool edges, wall cap stones and pavers applied over existing concrete or asphalt pavement. Manufactured from high quality adhesive resins and durable elastomers. Fast drying solvents ensure early tensile and adhesive strength.
